Team Leader - (Integrated Water Planning)

- 2 Positions Available
- 5-7 Years Practical Water Industry Experience
- Flexible Work Conditions

Outstanding engineering management opportunity! Play a role in solving the World's water crisis with an ethical company while enjoying innovative and flexible work practices

Sustainable Solutions International Pty Ltd is a company at the cutting edge of environmentally sustainable development. We strive to achieve optimal engineering solutions that ensure environmental benefits and economically viable projects through innovative problem solving and the practical application of cutting edge technologies from around the world. We are currently working on a range of interesting projects with some of Australia's and the world's largest companies and local governments, providing solutions to the nation's water crisis.

We are seeking 2 innovative, environmentally and socially minded Engineers or Scientists with 5 to 7 years experience to take a team leader position to head 2 teams in the Integrated Water Planning Division of our Brisbane office. This pivotal role will see the successful candidate manage a team of three (3) engineers and scientists in a diverse team environment. They will be responsible for managing the team's projects and providing technical assistance, project management guidance and Quality Assurance for the team in water resource planning, sustainable water management strategies, water auditing, environmental licensing and compliance reporting.

Ideally, the successful candidates will have a solid background in water, wastewater and recycled water planning, auditing and environmental licensing and are looking for their next career move with longer term opportunities to grow with the company.

We are a flexible company with innovative work practices and will consider all individual working requirements.

The successful candidates will:

- Have a minimum of 5 years experience, ideally in a broad range of water/wastewater planning, auditing and environmental licensing areas within Australia. Alternate experience in a similar field may be considered for the right candidate;
- Be socially minded and interested in environmentally sustainable projects
- Have environmental science/engineering experience and technical skills relevant to water, wastewater and recycle water planning and licensing
- Demonstrated project/team leadership with the ability to coordinate the delivery of multiple projects
- Demonstrated ability to lead and mentor junior staff in the full range of engineering/ science functions
- Working knowledge of commonly used modelling packages (eg MUSIC and MEDLI)
- Have sound science or engineering qualifications from a recognised university
- Have a valid drivers licence.

As we seek to fill two (2) roles with the best candidate all applications nationally and internationally will be considered.
